User: Women  
Material: ABS, Silicone, Metal  
Finish: PU coating  
Size: H: 197.7MM W: 68MM.  
D: 42.6MM  
Battery: Polymer Lithium 3.7V  
750mAh 802535  
Voltage: 3.7V  
Number of Vibrations: 10X  
vibration plus squirting  
User time: 2 hours  
Sound Level: 45dB

#### CHARGING INSTRUCTIONS

This vibrator arrives partially charged, so it is recommended to fully charge before use.

Connect the USB plug into the USB port of your computer or other output and the other end of the DC charger into toy's input.

Initial charge will take about 3 hours, and subsequent charges will take about 2.5 hours to complete.

The indicator light will flash while device is charging, and remain solid when toy is fully charged. There is no danger of battery damage by overcharging, but it's recommended not to overcharge for long periods of time.

Charge lasts for about 3 hours of play time at the lowest level of vibration, and about 2 hours at the highest level.

Toy vibration slows before stopping completely when charge is fully depleted.

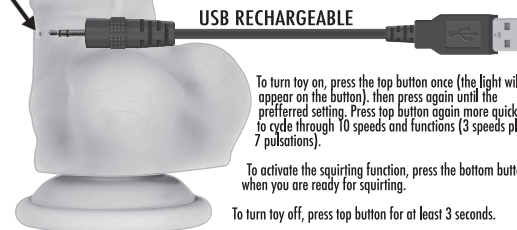

This toy comes with a rechargeable battery (Polymer Lithium 3.7V 750mAh 802535) and operates at a voltage level of DC3.7V. It emits sound vibrations at less than 45db.

#### INSTRUCTIONS FOR USE

This toy has a simple two-button control. The top button turns the toy on and cycles through 10 vibration speeds and functions; the bottom button operates the squirt function.

HERE

#### USB RECHARGEABLE

To turn toy on, press the top button once (the light will appear on the button), then press again until the preferred setting. Press top button again more quickly to cycle through 10 speeds and functions (3 speeds plus 7 pulsations).

To activate the squirting function, press the bottom button when you are ready for squirting.

To turn toy off, press top button for at least 3 seconds.

To fill chamber pull up metal handle and twist to left to remove cap.

Fill with water or lube just below rim of chamber.

To close put cap back on and twist to right to tighten.
