GENDER X

Product Specifications:

Material: Silicone & ABS
Battery: 902040 / 700mAh
Voltage: 3.3-4.2V
Number of Vibrations: 10
User time: 60 Minutes
Sound Level: 50db

CHARGING INSTRUCTIONS

It is recommended to use up the existing power first (toy arrives at about 80%) before initial charge to prolong battery life. A full charge will take about 2 hours. Charge lasts for about an hour with average use.

To charge, connect the USB plug into a power source and the DC charger onto the charging pins at the side of the toy's center. The indicator light will flash while device is charging and stay constant when toy is fully charged.

This toy operates at a sound level of less than 50db with a rechargeable 700mAh lithium battery at a voltage of 3.3V - 4.2V.

INSTRUCTIONS FOR USE

1. Operate this toy with its buttons directly or use the remote control once the motors are in standby.
- NOTE: Use toy's buttons directly to turn toy on and off. The remote can operate the motors once they are in standby mode, and it can put toy back into standby mode, but it can't turn toy on or off completely.
2. Each end of the toy has its own button with a corresponding arrow that points in its direction. Press the shaft arrow button for 1.5 seconds to turn on the motor in the shaft. The light will turn on and the motor will begin in standby. Press the same button again more quickly to cycle through 10 speeds and patterns.
3. Press the plug arrow button for 1.5 seconds to turn on the motor in the plug. The light will turn on and the motor will begin in standby. Press the same button again more quickly to cycle through 10 speeds and patterns, then back to standby.
4. On the remote, the 'up' arrow controls the shaft, and the down arrow controls the plug. Once either or both motors are engaged and in standby (by using buttons directly on toy), use the remote buttons to cycle through 10 speeds and patterns in either motor.
5. Press each arrow button again on the toy directly for 1.5 seconds to turn motors off. The light will go out and all vibration will cease.

USB RECHARGEABLE
