

GODDESS COLLECTION ALPHEUS

This waterproof rabbit vibrator is made of body safe 'liquid' silicone, which makes it very soft to the touch. It feels like the real thing. The 2 powerful motors, located in the top of the shaft and in the clitoris stimulator, offer 3 levels of steady vibration and 7 different rhythms. The extra ridges on the shaft under the glans add extra stimulation to the experience. A special feature of the Alpheus is the moving beads function. There are beads in the shaft that follow the motions of the vibrations. The rabbit is flexible and has 2 soft flexible ears for ultimate clit stimulation. Press and hold the power button for 2 seconds to turn the unit on/off. Press the function button to start and switch the vibration patterns and the moving beads speeds. Short press the lower button to cycle through the clitoral rabbit vibration modes.

FEATURES
